Re: <u>Letter of Reference for Ming Jing</u>

February 9, 2017
bcit.ca

Greetings,

I am writing to support and also to endorse the application of Ming Jing. Ming mentioned that he had applied to Fortinet and that he requires his transcript from BCIT. I am glad to provide you the information that we have about Ming's grades and I am also glad to be a reference for Ming.

We do not have an official transcript for Ming yet since his graduation date is not until May 19th, 2017. Unofficially Ming can be available in April if you require and we will support him on this transfer.

As the Option Head and Lead Instructor of the Software Systems Developer program, I have verified that Ming's grades for modules that he has completed are as follows:

Applied Computer Concepts	92%	**ASP.NET part 1**	86%
Intro to Software Development 1	96%	**C# - Part 1**	97%
Java	85%	**C# - Part 2**	94%
JavaScript	92%	**Relational Database**	100%
Angular	100%	**System Analysis and Design**	77%

The Software Systems Developer (SSD) program where I work with Ming is focused on web and mobile software development. Mobile components include iOS and Android. SSD is an 8-month program for students who typically have some coding experience but who want to gain current skills.
http://www.bcit.ca/study/programs/699ccertt

Ming has been an excellent above average performer. His previous experience in C++ coding and with network administration shows in his work. Ming has been a reliable, low maintenance and pleasant individual who can be counted on to get the job done properly. Ming's consistency in on-time delivery and his demonstration of integrity has been continuous since I met him. He works well with all teams and he demonstrates good solid judgement for being effective and professional at all times.

Please feel welcome to contact me if you wish to discuss Ming Jing's application further.

Sincerely,

Pat McGee
Option Head and Lead Instructor, Software Systems Developer Program
